Mayfly Rise

The “**Mayfly Rise**” project on the Ovens River at Bright will include installation of in-stream habitat (wood & boulders), and streamside planting of native trees, shrubs, and grasses.

This will provide refuge and food sources for trout, native fish, platypus, water rats and other water creatures.

2016 - Alpine Fly Fishers and North East Catchment Management Authority representatives inspect the site

Keen anglers, Dustin & Gemma. Alpine FF members and volunteer tree planters.

Habitat works on the Ovens River at Frosty Corner, 2015

Completed habitat restoration works at Frosty Corner – June 2016

“Trees For Trout” volunteers: Buckland River

“Trees For Trout” volunteers: Nariel Creek

“Teamwork makes the Dream Work”

If you are an angler and would like to give something back to our fisheries and waterway health, please go to:

australiantroutfoundation.com.au

and join up as a member.

The “**Mayfly Rise**” project is a prime example of volunteer anglers working together to restore the health of our iconic waterways and fisheries.

Alpine Fly Fishers acquired a grant from the **Recreational Fishing Licence Trust** to fund this important project.
